**Add Classes**
To enroll in courses, you must add each class to your schedule via the Student Administration System.
After logging in, navigate to **Add Classes** by clicking:
Click the Enroll link to access the enrollment tools. The Enroll tab displays with the add tool selected.

**Add Classes**

There are three steps to adding classes.

- **Step 1:** The first step is to select classes to add each class to your enrollment shopping cart.

Enter the class number of the course. Each class has a unique number corresponding to it. The class number is in the first column of each chart listed under course information above.

Enter the class number in the field and click the enter button.

Before a class is added to your enrollment cart, you can edit the enrollment preferences. For instance, if a permission number is required to register for a course, you can enter it here. Or, the class may be for a variable number of credits. In this case, be sure to update the Units field to the correct number of credits. If you enroll in a variable credit course and do not update the Units field, the system will default to 1.00 credit. **All of our courses are 3 credits.**
